M-134

REPLICA WEAPON TRAINING SYSTEMS
GAR® PATENT # 8690575 B1

ACME's ultra-realistic replica weapons look, feel and function just like the actual machine guns. And they're coupled to a patented, all-electric, full-force, full-rate rate of fire recoil system.

A full set of sensors monitor the weapon status and gunner's actions. Ammo cans and feed chutes coupled with reloading logic train gunners to load, feed, charge, and fire quickly and correctly.
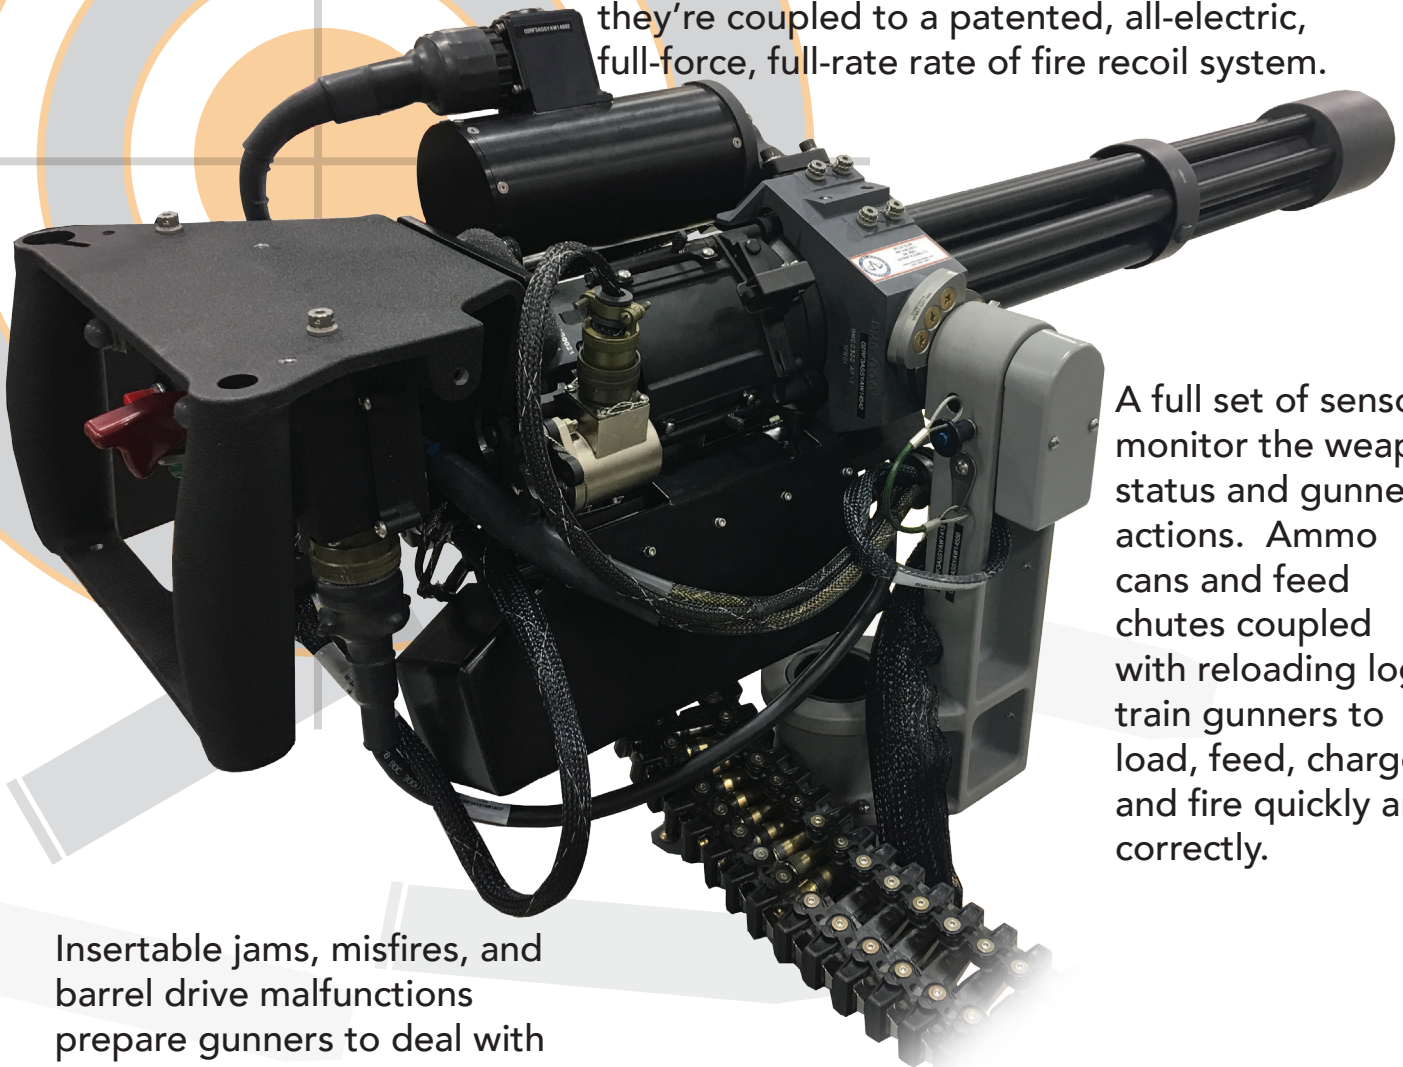

Insertable jams, misfires, and barrel drive malfunctions prepare gunners to deal with worst-case weapon issues.

REALISTIC REPLICA WEAPON...

REALISTIC RECOIL...

REALISTIC TRAINING!

M134 &
Minigun Variants

COMPLETE REPLICA WEAPON SYSTEM INCLUDES:

- <u>Replica Weapon</u> – Ultra realistic M134 weapon with sensors

- <u>Gun Active Recoil (GAR®)</u> – Integral, patented, all-electric, full-force, full-rate-of-fire recoil system built into the weapon body

- <u>Electronics Chassis</u> – Provides power and electronic drives for gun sensor and recoil system

- <u>Weapon Mount</u> – Can be a tripod or specific vehicle or aircraft mount such as helicopter door, window, or ramp mounts

- <u>Power and Signal Cables</u> – Standard 25' Cables allow weapon training away from remotely located electronics and power source

- <u>Technical Data Package</u>– Standard Operations & Maintenance Manual, Interface Control Document, Acceptance Test Procedures

- <u>Warranty</u> – One-year, Return-to-Factory warranty protects the product
